

What Software is my MLS Using?

Start the Internet Browser (Internet Explorer/Firefox/etc) and **LOG INTO** your **MLS**.

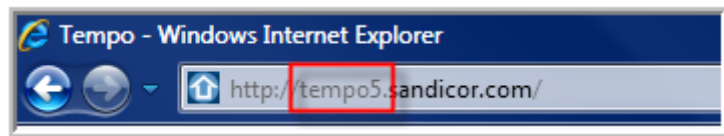

Once you're logged in, if your **ADDRESS BAR** looks like below, then you have ...

RappottoniMLS

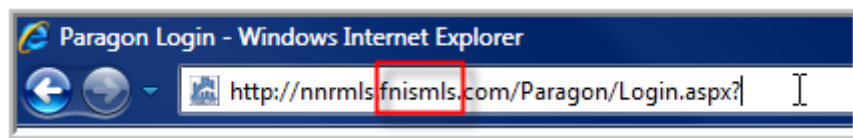

Look for **RAPMLS** in the address bar.

Tempo 5

Look for **TEMPO** in the address bar.

Paragon 4

Look for **FNIS** in the address bar.

It's possible for your MLS provider to have a different name in the ADDRESS BAR. If that is the case then you should contact your local MLS Support line and ask them, "What's the name of our MLS Software?"

It's also possible that your MLS system is CUSTOM BUILT specifically for your MLS. In that case you would need to select OTHER as your software type and enter CUSTOM as the MLS OTHER field on the signup form.
